

# How to Clean & Disinfect a Microphone

1 Unscrew the microphone grill

2 Gently remove the foam insert filter

4 Wash the foam insert with soap and hot water

3 Dip the grill in 70% isopropyl alcohol solution (do not use bleach)

5 Clean the microphone handle and body with an alcohol-based wipe or soft cloth dipped in solution

6 Use a hair dryer or air dry the components, then insert the foam back into the grill

7 Reassemble the microphone

Enjoy a fresh, clean, and sanitary microphone!
